INFINITY SERIES RED, BLUE, COPPER

The Infinity series models are taller than its previous counterparts, and much of this increase in height is between the grill and top of the lid. Now you can cook on multiple levels much more effectively than many other ceramic cookers on the market (you can comfortably cook a 30lb turkey on the large model).

The Infinity Series features heavy duty 304 series stainless steel so you can rest assure the hardware will stand the test of time. The Infinity Series is a testament to Grill Dome's commitment to deliver great value and quality at an affordable price!

The Infinity series features TERAPEX® Ceramics, which can withstand much higher dome temperatures. Ceramics are designed to withstand extreme temperatures, and also optimize the balance between porosity and density to deliver improved cooking results for a wider array of foods.

Last but not least, the Infinity Series also includes a **Lifetime Warranty** – as always.
